Preface

The World Health Organization (WHO) sees the Millennium Development Goals (MDG) as milestones on the road to health for all. Therefore, along with other partners in health development, it is committed to assist Member States in tracking the progress in and measuring achievements towards health-related MDGs. One of the tangible results of that commitment is this brochure, *Health-related Millennium Development Goals 2005*, brought out by WHO, for the first time, presents quantitative data on health-related MDG indicators of the 48 countries and areas in Asia and the Pacific that comprise the WHO South-East Asia and Western Pacific Regions.

To view, in quantitative terms, whether progress towards the targets is on track, two data points – 1990 baseline and the latest year for which data was available – have been reported. For data between these two reference points, readers may refer to the brochures on *Basic Indicators of the South-East Asia Region 2002 and 2004* and the *Country Health Information Profiles 2004 of the Western Pacific Region*, as well as other WHO publications that cover the MDG including the *World Health Report 2003*.

Data has been captured either directly from MDG reports of the countries submitted to WHO or through other UN sources. In instances where specific information is lacking from MDG country reports, data has been extracted from national health information bulletins and other official national publications.

All efforts have been made to collect, compile, analyze and present the most recent data for each specified time period, and to adhere to WHO's five criteria for statistical reporting: validity, reliability, cross-population comparability, data audit trail and consultation with national authorities. However, depending upon the capacity and capability of national health information systems in monitoring and reporting on the MDG process and, to some extent, due to differences in definitions, concepts and measurement units, reported data for some indicators may have limitations. Therefore, caution should be exercised, particularly when using the data for trend analysis or intercountry comparisons. For information on other health indicators not specifically related to the MDG, readers may refer to *Core Indicators 2005: Health Situation in the South-East Asia and Western Pacific Regions*.

It is hoped that this brochure would facilitate sharing, among all stakeholders, of this state of quantitative evidence available on the progress towards achieving the Millennium Development Goals. It should also help to foster debate, strengthen alliance building, and renew political commitment at the country level to seize the opportunity offered by the Millennium Development campaign and to link the MDGs with national development priorities.

Country/Area	Goal 1: ERADICATE EXTREME POVERTY AND HUNGER				Goal 4: REDUCE CHILD MORTALITY						Goal 5: IMPROVE MATERNAL HEALTH			
	Target 2 : Halve, between 1990 and 2015, the proportion of people who suffer from hunger				Target 5 : Reduce by two-thirds, between 1990 and 2015, the under-five mortality rate						Target 6 : Reduce by three-quarters, between 1990 and 2015, the maternal mortality ratio			
	G1.T2.I4 – Prevalence of underweight children (under five years of age) (%)		G1.T2.I5 – Proportion of population undernourished (2005) (%)		G4.T5.I13 – Under-five mortality rate (probability of dying between birth and age 5) (per 1000 live births)		G4.T5.I14 – Infant mortality rate (per 1000 live births)		G4.T5.I15 – Proportion of 1 year-old children immunized for measles (%)		G5.T6.I16 – Maternal mortality ratio (per 100,000 live births)		G5.T6.I17 – Proportion of births attended by skilled health personnel (%)
